

Portable Unit Heater

The UPI portable unit heater provides clean, odorless backup heat in indoor work areas. Rugged enough to provide temporary heat at construction sites, this portable unit is well suited for commercial heating applications.

Applications

- Commercial Workshops
- Construction Job Sites
- Large Unheated Areas

Standard Construction Features

Heating Elements – Steel tubular elements provide durability.

Housing – Heavy 22-gauge galvanized steel cabinet has an almond color baked-on epoxy-polyester powder paint finish.

Inlet/Outlet Grilles – Intake and discharge grilles are made of industrial gauge steel and both have a finger-proof design for added safety.

Built-in Controls – Unit comes with an automatic reset thermal cutout and adjustable thermostat.

Fan Motor – Durable factory-lubricated fan motor with 300 CFM.

Heavy-duty Cord – A six-foot heavy-duty cord with 30 amp, 250 VAC NEMA type #6-30P plug is provided on each unit. The handle of the heater may be used as a reel for the cord set.

Portable Unit Heater Listing

Adjustable thermostat and six-foot cord with 3-pronged, 30 amp, 240 volt plug included.

Watts	Volts	Total Amps (1)	CFM	Approximate Air Temperature Rise °F (°C)	Weight lb (kg)	Catalog Number
4800	240/1	21.0	300	51 (28)	11 (5)	927U04800JA

(1) Total Amps = Heating element amps and motor amps.
Only available with almond finish.
